Re: complaint of oil in the sanitary sewer – M19 SW, MH 54

On July 19, 2001 Randy Lyman informed me that Troy Morehouse, Infiltration Inflow Crew, told him that oil was observed in MH 54, M19 SW. I went to that location on July 19, 2001, at approximately 3:00 P.M. and did not see any oil. The flow in the manhole was clear. The bottom of the invert was dark in color. I will check this manhole a couple of times in the next few weeks to see if I can see anything.

7-24-01 2:45 P.M. I Again checked this MH
And found only clear water with 1 silver streak.
I will check it Again,
GP.
